

Third BEMF meeting

21 May 2010

- Apologies:
 - Brian Brink
 - Nonkosi Khumalo
 - Dr. Sue Cleary
 - Andrew Boulle
 - Magagane Mahlodi
 - Sheila Barsel
 - Alex van den Heever
 - Francois Venter
- Website: <http://www.section27.org.za/bemf>

Activities

- Submission to Parliament
- Workshops with TAC
- Finalised fact sheet
- Negotiations with Open Society to support us
- Letter by clinicians on drug registration to MCC
- Letter to pharma companies + DOH on packaging for tender
- Letter to Aspen on FDC registrations and Matrix
- PSAM/TAC Statement on OSD
- Communication with Health and Treasury on tender

Feedback

- Key message in your feedback:
 - Assumed too much knowledge
 - Greater emphasis on budget education.
- Hence we have finalised the fact sheet and asked Brian Honermann to explain the budget in today's meeting.

Where are we?

- Monitoring and Evaluation
 - Has any real progress been made?
- How close are we to a **sufficiently funded ARV tender that provides for patient demand and includes once-daily tenofovir based regimens?**
- IST reports
 - Despite commitments, they haven't been made available.
- Global funding cutbacks, in particular PEPFAR.

Where to from here for the BEMF?

- What can the organisations here do to improve our knowledge?
- What can the organisations here do to improve the quality of spending, M&E, the tender, facilitate the quality of the rollout, prevent stockouts etc.

Possible Tasks

- Obtain and verify numbers of people on treatment in private and public sectors like the JCSMF used to do.
- Help maintain the Incidents Database and establish an HIV helpline.
- Analyse Auditor General reports.
- Much closer provincial expenditure monitoring
- Provide expertise on future PEPFAR expenditure.
